## About ALDEL Education Trust

Aldel Education Trust is a Christian Religious Minority Trust established in the year 2007, with the objective of providing professional knowledge, developing expertise and enhancing the creativity of youth.

## About SJCEM

St. John College of Engineering and Management (SJCEM), is a Christian Religious Minority Institute as notified by the Maharashtra State Minorities Development Department, approved by AICTE, affiliated to University of Mumbai and accredited by NAAC - National Assessment and Accreditation Council for five years. The college was established in the year 2008 for providing Professional education, developing the expertise and enhancing the creativity of youth of the Suburban and Rural population by the Philanthropic visionary and renowned industrialist MR. ALBERT W. D'SOUZA Chairman

of Aldel Education Trust, Managing Director, Printania Group of Industries and Chairman of Model Co-op Bank Ltd, with the vision "Excellence in Serving to Educate, Educating to Serve". At SJCEM, we offer five UG programs in the most coveted disciplines namely: Civil Engineering, Computer Engineering, Electronics & Telecommunication Engineering, Information Technology, Mechanical Engineering.

## About Department of Computer

The department of Computer Engineering was established in the year 2008 with a vision to be a department committed to develop capable and efficient computer Engineering graduates with an aptitude for research and leadership qualities. Computer Engineering, one of the main branches, is now reshaping itself with advanced technologies with rapidly growing Industry. The Department of Computer Engineering is equipped with well qualified and experienced Faculties and supporting staff with technology based skill-set. The department is advancing towards research based education system.

## About the Program

The workshop is a mix of theoretical & hands on sessions. Theoretical

significance of database concept & SQL commands followed by Web Services including SSIS & SSRS techniques will be provided in initial three days. Last two days will focus on testing of the applications created through Integration of Database & Web Services. The sessions will be interactive ones.

## Programme Outcomes

Participants will be able to understand:

- ◆ The basics of database.
- ◆ Learn to use web services using SQL Server Integration Services (SSIS) packages and execute packages for Data Migration tasks.
- ◆ Learn to use SQL Server Reporting Services (SSRS) to generate and deploy reports.
- ◆ Introduction to testing and SDLC, different testing techniques.
- ◆ To create test plan and test tools to build test report.
